

Paul Masters decided to give us a demonstration of how low his one 15-inch Lightning Audio could drop. I have to admit that I was left gob-smacked when I saw the windscreen flexing so much that you would have sworn it was an SPL car.

Besides the bass being so good the vehicle sound systems dynamics was also dialed and won the overall sound quality for the day's event. Remember, this is not RF, but the sister company – Lightning Audio, these woofers are not regarded as super high-end, as some of our competitors were using on the day. The vehicle also showed off the flexibility of the system and Paul's fine tuned ear.

Congratulations to Team Hygrade!
